

Apart Poster Template

Conference posters are a **networking tool**

What that means

- Conference posters *should*:
 - Tell a story
 - Be eye-catching and approachable
 - Prompt questions
- Conference posters *should not*:
 - Explain all of your research
 - Pack content tightly
 - Be “plug-and-play”

Poster Creation Guide

0 Logistics

Gather the following information:

- Date of workshop
- Poster size
- Poster orientation
- How you will be printing the poster
 - Poster submission deadline

1 Understand the story

What are the **key takeaways** (≤ 2) that you want viewers to learn from your poster?

Why should a viewer care about your work?

What is the path from the problem/question (why they care) to your solution?

How does your solution relate to the key takeaways?

2 Plan layout

Group your story into ~5 buckets

- Some like to label these buckets **Background, Question, Methods, Results, and Conclusion**, but this is **not** necessarily the best framing for your research!
- Feel free to consider other options and get creative with it

Create boxes for these regions, and bring in the 2-3 plots that will help viewers reach your takeaways – use these dummy elements to plan what the final poster will look like

If you know you plan on using other graphics (e.g. QR codes/logos) also bring those in now

Poster Creation Guide (cont.)

3 Fill it in

Add content to the dummy boxes

- Keep things as concise as possible
 - Bulletpoints are your friend
-

4 Make it look good

Choose a color scheme – the **Apart Dark** colors have already been included on this document, but this does not necessarily *have* to be yours

Make sure similar elements have similar styles – e.g. bounding boxes, section headers

You will almost certainly want to make new versions of your plots/figures so that you can

- **Simplify them as much as possible**
 - Apply the poster color scheme
 - Call out the important spots
-

5 Get feedback

Send to others (**specifically Jacob**) for feedback – please send **at least one week** prior to deadline

Tips

Margins	Leave at least 1 inch around the edge of the poster empty; these have been designated with guides in this template	
Font Sizes	Title	~72-120
	Section Headers	~48-80
	Body	~36-48
Text	Use bullets, not paragraphs	
	Justify text when possible	
Sections	Sections should be well defined and labeled	
QR Codes	Use QR codes to share links, contact info, and interactive elements → create one online	
Alignment	Use guides and tables to help with aligning different elements	
Design	Plan rough layout (location & size of sections) prior to starting, it'll help a lot in the long run	
Plots	Simplify and enlarge	
	Apply color scheme to plots and figures	
Example	Benchmark Inflation Poster	

Your poster should tell a **story!**
